PROFESSIONAL SUMMARY

AI-focused Business Information Technology student combining full-stack development, machine learning, and business analytics to build decision systems that reduce manual effort and surface actionable insights. Hands-on experience with reinforcement learning, Power BI dashboards, and end-to-end web platforms that turn operational data into measurable outcomes. Seeking AI Analyst, Business Analyst, Data Analyst, or Software Developer roles where technical depth meets ROI-driven thinking.

EDUCATION

British Columbia Institute of Technology (BCIT)

Business Information Technology Management — AI Specialization

Burnaby, BC

Sep 2024 – May 2026

- Relevant Coursework: Machine Learning, Reinforcement Learning, Business Intelligence (Power BI), SQL & Database Management, Data Analytics, Cloud Fundamentals (Azure), Decision Support Systems, Process Analysis
- Certifications: Microsoft 365 Copilot Prompting Essentials (Microsoft, Mar 2026); Google AI for Business Applications (Google, Mar 2026)

TECHNICAL SKILLS

Programming & Development: Python, SQL, HTML, CSS, JavaScript (basic)

Data & Analytics: Power BI, DAX, Microsoft Excel (Advanced), Microsoft Access, Data Modeling, KPI Reporting

AI & Machine Learning: Machine Learning Concepts, Reinforcement Learning, Prompt Engineering, LLM Integration, Adaptive Systems

Cloud & Automation: Microsoft Azure (Fundamentals), n8n Automation, GitHub, Streamlit

Business Analysis: Requirements Gathering, Process Mapping, Stakeholder Communication, Dashboard Design, Workflow Optimization

PROJECTS

Senior Services Directory | BCIT Capstone Project (BSYS-4905)

Jan 2025 – May 2026

- Led full-stack development of a Streamlit-based senior services directory for a community nonprofit client, as part of a 4-person capstone team reporting to real stakeholders and a faculty advisor.
- Implemented AI intent-matching and voice search so seniors and caregivers can find services in plain language, replacing rigid menu navigation.
- Drove weekly stakeholder reviews, translating client feedback into structured data redesigns, UI improvements, and prioritized release scope.

AI Ticket Routing System (Reinforcement Learning) | BCIT

Jan 2026 – Mar 2026

- Developed an adaptive reinforcement learning system that intelligently routes incoming tickets to optimal agents in high-volume environments, modeling real-world SOC and ITSM operational scenarios.
- Reduced ticket reassignment rates by 85%, materially improving SLA response times; built a real-time dashboard tracking model learning curves, agent performance, and routing accuracy.

Homigo Housing Platform | BCIT

Sep 2025 – Dec 2025

- Developed a full-stack housing platform (ASP.NET Core) with structured search, listing management, and role-based access for renters and property managers.
- Improved search efficiency and user experience by 30% through query optimization and UX iteration; engineered a scalable architecture supporting concurrent user sessions and dynamic listing updates.

Business Intelligence Dashboard (Power BI) | BCIT

Sep 2025 – Dec 2025

- Designed a Power BI dashboard with custom data models and DAX measures, surfacing operational KPIs from multi-table datasets to support data-driven decision-making and improve reporting clarity for non-technical stakeholders.

WORK EXPERIENCE

Progressive Telecom — Software Developer (Part-time)

Burnaby, BC | Jan 2026 – Present

- Build and maintain internal web tools and reporting dashboards (Python, SQL) that consolidate fiber-splice, installation, and network-service records for 100+ field staff, giving operations real-time project visibility and reducing manual reporting.
- Developed automated reporting and KPI dashboards (SQL, Power BI) that transform raw job, scheduling, and inventory data into actionable metrics, reducing manual tracking time and surfacing resource-allocation insights for management.
- Gather requirements from operations and field teams and translate them into practical software features, improving workflow efficiency and data accuracy across install and service jobs.

Persia Foods — Assistant Manager (Full-time)

Burnaby, BC | Sep 2022 – May 2026

- Manage daily operations in a high-volume retail environment: staff scheduling, inventory cycles, and sales-data reporting that informs inventory decisions and operational trends for ownership.
- Designed and built the company's full-stack digital ordering platform (Next.js, SQL) with a loyalty-points engine, role-based dashboards, and a bilingual AI chatbot.

Rexford Build and Production Ltd. — Data & Business Analyst (Part-time)

Burnaby, BC | May 2025 – Jul 2025

- Performed cost-and-time and feasibility analysis for a drone-based SkyTrain rail-line inspection proposal (TransLink), estimating imaging data volumes and quantifying savings versus manual inspection to support the business case.
- Built data models and reporting to evaluate power output and modular scaling (1–100 kW) for Gravitational Water Vortex Power Plant (GWVPP) clean-energy units, supporting site-feasibility and commercialization decisions.
- Supported market and site-feasibility analysis for a proposed bottled-water production facility in British Columbia, structuring project data into stakeholder-ready documentation for planning decisions.

Dynamic-sat Company — Social Media & Content Coordinator (Part-time)

Montreal, QC | Oct 2022 – Dec 2022

- Produced and scheduled multi-platform content (Instagram, YouTube, Facebook), analyzed engagement metrics, and streamlined production workflows using Canva and AI-assisted tools.
