EDUCATION

British Columbia Institute of Technology (BCIT)
Business Information Technology Management, AI Specialization
◦ **Certifications:** Microsoft 365 Copilot Prompting Essentials (Microsoft) · Google AI for Business Applications (Google)

Burnaby, BC
May 2026

EXPERIENCE

Junior Software Developer (Part-time)
Progressive Telecom: *Telecommunications Provider*
◦ Turned scattered **billing and customer data** into clean management reports by writing **SQL** queries and **Python** scripts
◦ Kept **invoicing and cost tracking** accurate by reconciling billing figures in **Excel** and validating each record
◦ Delivered **on-demand reports** for the team by translating their requests into **SQL** queries and Excel outputs

Burnaby, BC
Jan 2026 – May 2026

Assistant Manager
Persia Foods: *Persian Grocery Chain, Metro Vancouver*
◦ Replaced manual ordering and loyalty tracking by independently building a **full-stack digital platform** (see Projects)
◦ Supported ownership's **purchasing and staffing decisions** by producing regular **sales and inventory reports**
◦ Kept a high-volume store running smoothly by supervising **scheduling, inventory, and customer service**

Burnaby, BC
Sep 2022 – May 2026

Social Media & Content Coordinator (Part-time)
Dynamic-sat
◦ Streamlined **multi-platform content production** by creating posts with **Canva** and **AI-assisted tools**
◦ Improved content decisions by tracking **engagement metrics** and shifting posts toward top-performing formats

Montreal, QC
Oct 2022 – Dec 2022

TECHNICAL SKILLS

- **Programming:** Python (Pandas, scikit-learn), SQL, C#, JavaScript, HTML, CSS, DAX
- **Data & Analytics:** Power BI, Excel (Advanced), MS Access, Pandas, Data Modeling, KPI Reporting, Dashboard Design
- **AI & Machine Learning:** Machine Learning, Reinforcement Learning, Adaptive Systems, LLM APIs, Prompt Engineering
- **Development & Cloud:** Next.js, ASP.NET Core, Streamlit, Prisma, PostgreSQL (Supabase), Azure, Git/GitHub, n8n
- **Business & Finance:** Requirements Gathering, Process Mapping, Workflow Optimization, Stakeholder Communication, Sales Reporting, Billing & Invoicing, Cost Tracking, Financial Reconciliation, Decision Support Systems
- **Customer & Operations:** Customer Service & Support, Team Leadership, Scheduling, Inventory Management, POS Systems
- **Tools & Languages Spoken:** Microsoft 365, Microsoft Copilot, Canva · English (fluent), Persian (native), French (basic)

TECHNICAL PROJECTS

BCIT Capstone: CCWS Senior Services Directory | *Python, Streamlit, Llama 3.2, Claude API*
◦ Replaced rigid menu navigation for seniors with plain-language **AI intent-matching** and **voice search**, leading a **team of 4**
◦ Kept the build aligned with the nonprofit client by running **weekly stakeholder reviews** and reprioritizing release scope

Jan 2026 – May 2026

AI Ticket Routing System | *Python, Reinforcement Learning, Data Visualization*
◦ Tackled slow manual ticket assignment in **SOC/ITSM** teams by building an **adaptive RL agent** that routes to best-fit agents
◦ Improved **SLA response times** by automating reassignment; built a **real-time dashboard** to track routing accuracy

Jan 2026 – Mar 2026

Homigo: Housing Platform | *C#, ASP.NET Core, Azure SQL, App Service*
◦ Gave renters and managers one place to search and manage listings by **deploying to Azure** with **role-based access**
◦ Improved search efficiency and UX by **30%** through **query optimization** and iterative testing

Sep 2025 – Dec 2025

Persia Foods Digital Operations Platform | *Next.js, PostgreSQL (Supabase), Prisma, LLM API*
◦ Digitized the chain's ordering and loyalty on a **32-table relational database** with **POS integration** and a **loyalty engine**
◦ Gave all 4 user types their own **role-based dashboards** and served customers with a **bilingual (English/Persian) AI chatbot**

2025

YVR Demand Forecasting (ML) | *Python, Pandas, scikit-learn*
◦ Forecast airport ground-transport demand by comparing **regression models**; **Random Forest** performed best (**R² = 0.58**)

2025

Atelier Analyst: AI Data Analysis App | *React, Claude API, Recharts*
◦ Made CSV analysis code-free: built with **AI-assisted coding** an app where the **Claude API** summarizes data and charts it

2026
