PROFESSIONAL SUMMARY

AI-focused Business Information Technology student combining full-stack development, machine learning, and business analytics to build decision systems that reduce manual effort and surface actionable insights. Hands-on experience with reinforcement learning, Power BI dashboards, and end-to-end web platforms that turn operational data into measurable business outcomes. Seeking AI Analyst, Business Analyst, or Data Analyst roles where technical depth meets ROI-driven thinking.

EDUCATION

British Columbia Institute of Technology (BCIT) Burnaby, BC
Business Information Technology Management — AI Specialization Sep 2024 – May 2026

- Relevant Coursework: Machine Learning, Reinforcement Learning, Business Intelligence (Power BI), SQL & Database Management, Data Analytics, Cloud Fundamentals (Azure), Decision Support Systems, Process Analysis
- Certifications: Microsoft 365 Copilot Prompting Essentials (Microsoft, Mar 2026); Google AI for Business Applications (Google, Mar 2026)

TECHNICAL SKILLS

Programming & Development: Python, SQL, HTML, CSS, JavaScript (basic)
Data & Analytics: Power BI, DAX, Microsoft Excel (Advanced), Microsoft Access, Data Modeling, KPI Reporting
AI & Machine Learning: Machine Learning Concepts, Reinforcement Learning, Prompt Engineering, LLM Integration, Adaptive Systems
Cloud & Automation: Microsoft Azure (Fundamentals), n8n Automation, GitHub, Streamlit
Business Analysis: Requirements Gathering, Process Mapping, Stakeholder Communication, Dashboard Design, Workflow Optimization

PROJECTS

Senior Services Directory | BCIT Capstone Project (BSYS-4905) Jan 2025 – May 2026

- Led full-stack development of a Streamlit-based senior services directory for a community nonprofit client, as part of a 4-person capstone team reporting to real stakeholders and a faculty advisor.
- Implemented AI intent-matching and voice search so seniors and caregivers can find services in plain language, replacing rigid menu navigation.
- Drove weekly stakeholder reviews, translating client feedback into structured data redesigns, UI improvements, and prioritized release scope.

AI Ticket Routing System (Reinforcement Learning) | BCIT Jan 2026 – Mar 2026

- Developed an adaptive reinforcement learning system that intelligently routes incoming tickets to optimal agents in high-volume environments, modeling real-world SOC and ITSM operational scenarios.
- Reduced ticket reassignment rates by 85%, materially improving SLA response times and workflow stability; built a real-time monitoring dashboard tracking model learning curves, agent performance, and routing accuracy.

Homigo Housing Platform | BCIT Sep 2025 – Dec 2025

- Developed a full-stack housing platform (ASP.NET Core) with structured search, listing management, and role-based access for renters and property managers.
- Improved search efficiency and user experience by 30% through query optimization and UX iteration; engineered a scalable architecture supporting concurrent user sessions and dynamic listing updates.

Business Intelligence Dashboard (Power BI) | BCIT Sep 2025 – Dec 2025

- Designed a Power BI dashboard with custom data models and DAX measures, surfacing operational KPIs from multi-table datasets to support data-driven decision-making and improve reporting clarity for non-technical stakeholders.

WORK EXPERIENCE

Persia Foods — Assistant Manager (Full-time) Burnaby, BC | Sep 2022 – Present

- Manage daily operations in a high-volume retail environment: staff scheduling, inventory cycles, customer-facing workflows, and sales-data reporting that informs inventory decisions and operational trends for ownership.
- Designed and built the company's full-stack digital ordering platform (Next.js, 32-table relational database): loyalty points engine, role-based customer/staff/manager dashboards, and a bilingual English/Persian AI chatbot.

Dynamic-sat Company — Social Media & Content Coordinator (Part-time) Montreal, QC | Oct 2022 – Dec 2022

- Produced and scheduled multi-platform content (Instagram, YouTube, Facebook), analyzed engagement metrics, and streamlined production workflows using Canva and AI-assisted tools to reduce turnaround time.
